INDUSTRY EXPERIENCE

Product Design Consultant

Freo (Previously MoneyTap), Bangalore, May'23 - Nov'23

Responsible for redesigning the Freo Pay card flow and for defining the Design Language System for Freo keeping the Freo Save design as a base. This helped the team in streamlining overall design process across all products.

Senior Product Designer

Freo (Previously MoneyTap), Bangalore, Dec'19 - Dec'22

Responsible for the end-to-end user experience and design of the savings vertical of Freo (Freo Save). Freo Save is a digital savings bank account in partnership with Equitas Small Finance Bank. We worked on this project from scratch and we made it live in 9 months.

Responsible for the redesign and improvement of the MoneyTap core product from a user experience and interface standpoint. This reduced the overall TAT by 1.5 mins and also reduced the number of clicks by 50% in the journey of getting a credit line.

UI/UX Designer

Loktra Technologies, Bangalore, Aug'18 - Nov'19

Responsible for the design of the manager panel for credit managers, primary goal was to give real-time visibility to them so that they can monitor their team, achieve targets and push the loan process in a much faster pace.

Designed an app for sales officers to help them keep a track of all their leads and complete all the tasks assigned to them.

My role involves understanding their current process, identifying all the pain points, ideating and coming up with solutions in the form of digital products. The ultimate aim is to aid in making the loan lifecycle better and simpler.

UI/UX & Graphic Designer

Noone, Milan, Sep'16 - May'18

Responsible for the identity design of an upcoming italian brand "BOND", a company which makes handmade bags. Main tasks included identity definition based on customer needs, logo design, tags and label design and packaging design.

Redesigned the wardrobe configurator of Flou. Main tasks included defining style, iconography and efficient user experience.

Redesigned and developed the company's official website. Main tasks involved ideation, wireframes, defining a visual style, designing and developing using HTML, CSS and basic JS.
